How you can be successful on this task:

1. Focus on Information card (**framed in violet**) topic and select **IRRELEVANT** search results among Top5 results (**framed in lime green**) which are not talking about the info card topic.
2. For complicated cases it is recommended to check search result links to understand real content of search results.
3. Pay attention to real content of the information card not only its title.
4. Also consider user location since sometimes relevance depends on locational needs too. For instance, "national metrology institute" query deserves different cards (US or India or UK etc.) based on user location!

You are expected to select checkboxes:

1. If information card and search result are **IRRELEVANT** select them and submit via Submit selection(s) button.
2. Some search results may be relevant and some of them can be irrelevant. You should only select **IRRELEVANT** ones and submit.
3. It is quite normal that sometimes all Top5 results are relevant to the information card topic. In such cases use **Top5 are Relevant** button to submit your judgment.
